BUSINESS IS GOOD

During the month of March my diamond sales aggregated \$200,000. Quite some business for a little big store, eh? Well there's a reason. The steady increase in my business is due solely to the fact that I sell diamonds for less than the other fellow. This has been proven hundreds of times and can be proven to you. My buying power is big and I am enabled to buy stones right as I pay cash for everything. This is something few jewelers, if any, in the southwest can boast of.

In buying gems of any kind the customer depends largely upon the integrity of the dealer and his ability to judge stones correctly. During my years of experience in the jewelry business, I have always been frank with a customer—never misrepresenting an article—and this alone is responsible for my success. I am considered the best judge of diamonds in the state and I'll wager \$100,000 that this is an absolute fact. A broad size you might say, but I can size you it is not made from an apocryphal standpoint and I am willing to back it up with real gold coin.

A new lot of stones just received from my New York representative await your inspection.
